#1 For Smart TVs
MediaTek makes theater-quality viewing experiences accessible in the home with cutting-edge imaging advancements.

#2 For Smartphones
MediaTek makes theater-quality viewing experiences accessible in the home with cutting-edge imaging advancements.

Tech Tips

- Set up Routines to bundle several actions into a single voice command. With the phrase “good night” you can program your smart devices to lock the doors and turn on your security system.

- Take advantage of geofencing to set up specific actions based on the location of your smartphone, such as having your lights and heater turn on when you get home.

- Your smart TV can serve as a hub for your smart devices, whether you want to check a video feed of your baby in the other room or see who just rang the doorbell.
